Profile

Over thirty years professional IT experience.

I specialise in cloud consultancy, cloud architecture and helping companies migrate to the cloud. I love coding modern cloud tailored business systems, particularly PWAA (Progressive WebAssembly Apps) supported by serverless Microservices.

Core Cloud Experience

Microsoft Azure Architecture, Administration and Migrations. Azure IAAS, PAAS and SAAS. Azure Serverless Function Apps. Azure Serverless Logic Apps, Azure Service Fabric, Containers, Kubernetes.

Core Development Skills

C#, TypeScript, JavaScript, Node, Swift, Rust, Microservices, Front and Backend Dev, OOP, Design Patterns, Clean Code, Git, TDD, Docker, Azure DevOps, CI / CD

Key Employment History

Cloud Architect • Full Stack Developer

Domainscanners.com: Milton Keynes, 2005 - Date (Owner)

I founded Domainscanners Ltd in 2005 as a small hosting company. In early 2016 I embraced the cloud and migrated our co-located servers into Azure. I continue to architect cloud solutions and oversee cloud migrations for clients and enterprises who want to benefit from the vast advantages the cloud offers.

Stack: Microsoft Azure, C#, TypeScript, JavaScript, Swift, Rust, Microservices, Containers, Kubernetes, Progressive Web Apps, WebAssembly, Web Development, Git, TDD, Azure DevOps, Docker, Dynamics 365

Lead Developer

Safenames: Milton Keynes, 2002 - 2005 (Partner)

Delivered our International Domain Name Registration Portal used to consolidate international domains.

Stack: ASP.NET, C#, SQL.

Mobile Developer

Vodafone: London, 2000 - 2002 (Contract)

Delivered Vodafones mobile WAP portal.

Stack: WAP, WML, Java, JSP

Mobile Developer

KPNQwest: The Hague, Holland, 1999 - 2000 (Contract)

Delivered Nokia 7110 phone access of intranet contact and calendar details over WAP.

Stack: WAP, WML, ASP, C# / VB

PC / Server / LAN Engineer, Developer

SD-Scicon / EDS: UK / Europe, 1988 - 1996 (Permanent + Contract)

Started at Scicon as a trainee PC engineer later providing 2nd and 3rd line support. I was also responsible for the engineering divisions client databases. This was way back in the days of dBase and Clipper. I performed server and LAN installations throughout the UK and Europe for a number of EDS's high-profile clients including General Motors, ATKearney and Rolls-Royce.
